

Guardus®
overtube

GUARDUS
gentle protection

US endoscopy

listening... and delivering solutions®

Offering protection and peace of mind...

The Guardus® overtube was developed specifically for enhanced protection and safety. It features an exclusive tapered tip design to protect against mucosal damage. Its unique insufflation cap helps maintain insufflation and guard against leakage of body fluids.

The Guardus® overtube is designed to assist with the following endoscopic needs:

- foreign body/sharp object extraction
 - stent removal
 - upper endoscopic mucosal resection
- minimizing the risk of aspiration
 - gastroparesis and achalasia
 - active upper GI bleed
- procedures requiring multiple scope insertions
 - food bolus procedures

insufflation cap

tapered tip

For more information on the Guardus® overtube, contact US Endoscopy today.

product number	description	scope OD (mm)	length (cm)	overtube OD (mm)	overtube ID (mm)	units/box
00711146	esophageal length/standard	8.6-10.0	25	19.5	16.7	3
